

## Taste Me, Do Good: Organic & Fair Trade Farms Certifications Program

Our **Taste Me, Do Good** products guarantee the highest level of social and environmental accountability in the food industry. Every year we publish a **Social & Environmental Impact Report** on our operations available at [tastemedogood.com](http://tastemedogood.com). All our farms and packaging facilities comply with our Organic Agriculture, Fair Trade & Food Safety Standards, and are certified by recognized 3rd party auditing bodies.

We utilize the following third party annual certifications:

**Organic Agriculture & Environmental Impact:** Organic agriculture is a production system that tries to maximize farm resources, by avoiding the use of synthetic products, such as pesticides, herbicides and artificial fertilizers.

Organic: USDA NOP/European Union/ JAS Japan / Biosuisse  
Biodynamic Demeter  
Naturland

**Fair Trade & Social Impact:** Fair trade means that producers receive a fair price for their products, workers get a fair wage for what they do and work under decent working conditions. Fair Trade processes also generate a social development premium (an amount of money) which is invested in projects that enhance development in the producers' communities.
